About this run

Scenario. A retailer wants a daily view of a competitor's catalog: what is listed, at which price, how it is rated and whether it is in stock. This report is generated automatically from that crawl.

Method. Playwright (Chromium, headless) walks all 50 category listings with pagination, using 4 concurrent browser pages, a 0.5 s polite delay with jitter and retries with exponential backoff. Every record is validated with pydantic before export.

robots.txt. No robots.txt (HTTP 404): no path restrictions (RFC 9309 2.3.1.3).

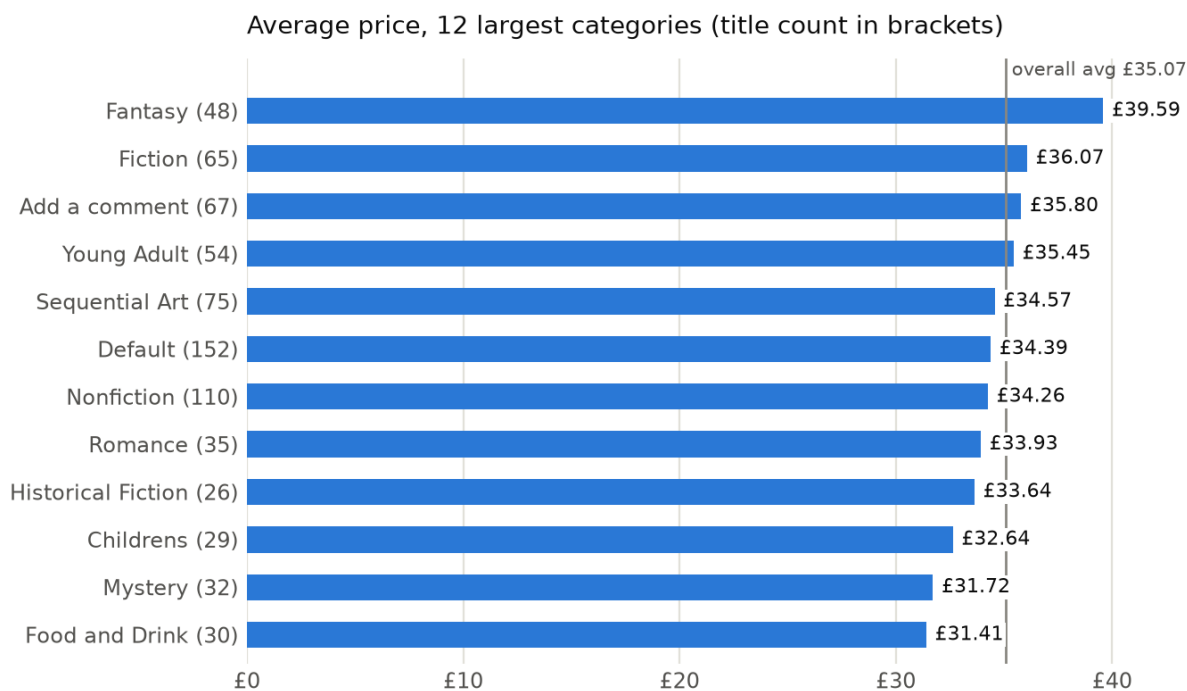

Quality. 80 listing pages OK, 0 failed, 0 retries, 0 invalid records, 0 duplicates removed.

Deliverables. books.xlsx (Data, Summary, Opportunities, Run Info), books.csv, this PDF and run_log.json.

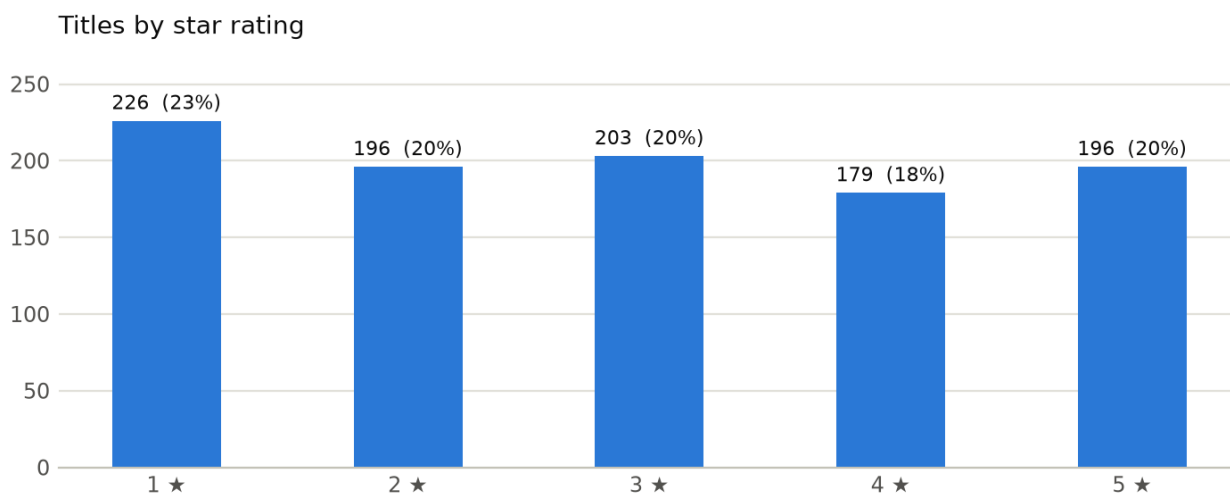

DEMO notice. books.toscrape.com is a sandbox: its prices and ratings are randomly assigned and have no real meaning. The numbers here only show what the pipeline produces.
